THE PROCESS IN DETAIL

MANAGING YOUR VEHICLE

1 Vehicle Management

To begin, we inspect the vehicle upon arrival and create a detailed condition report, including photo documentation. The vehicle is carefully hand-washed (initial cleaning charged at 250 CHF) and connected to a battery maintainer. It is then stored securely at our monitored indoor facility at Supercar Sharing, Kempththal, which is climate-conscious and access-controlled. Our team follows a strict protocol to ensure safety, cleanliness, and long-term preservation. Tire pressure, battery levels, and warning systems are checked regularly as part of our monthly service.

2 Ongoing Operations & Concierge Handling

Throughout the storage period, the vehicle is managed with monthly maintenance routines: engine startups, monitoring of alerts or errors, tire pressure checks, and hand cleaning. Should any technical issues arise, we coordinate directly with brand-certified workshops. Clients also benefit from our on-demand transport service, where we arrange secure delivery of the vehicle to any address or garage in Switzerland for annual service or inspections — ensuring the vehicle is always ready and maintained to the highest standards.

3 Client Communication & Flexibility

Our storage clients receive monthly updates on the vehicle's condition, along with images if requested. The car can be made available for pickup or delivery within 24 hours' notice. You maintain full access while enjoying a hands-off, fully managed ownership experience. Whether you're away for a season or maintaining a multi-vehicle collection, our service offers peace of mind, discretion, and tailored care.

Owner Tips & Recommendations

Schedule seasonal service early to avoid workshop waiting times. We'll handle the transport and coordination for you.

Rotate tires yearly for long-term storage to avoid flat spots — tire rotation service is included.

Let us know your return in advance so we can prepare the vehicle — clean, checked, charged, and ready to drive.
